

CELEBRATING 20 YEARS OF BSG

Founded in 1996, BSG has for the past 20 years been manufacturing a wide range of products such as industrial flooring, handrailing and self closing safety gates, all designed to cater for varying requirements.

BSG was established early in 1996. The company began life working out of a humble business unit but it wasn't long before it needed to move into larger premises. In July 1996 we moved to Shifnal and 3 months later secured a large order for an expansion at Heathrow Airport.

1998 saw us win our first really big order for £500k, which involved supplying handrailing for two massive Chinese power stations. Within 3 years of starting, the business had grown to over 50 employees and had a turnover of £5 million.

The run up to the millennium saw another milestone for BSG with us supplying all of the pedestrian walkway balustrades together with industrial products for other plant areas for the Millennium Dome. This saw us break the half a million mark, with orders totalling £700k.

We became part of the Kee Safety Group in 2003. This allowed us to expand our portfolio of products even further and following investment in new equipment and a more modern premises, we moved to Cradley Heath in 2010.

In 2012 the Olympics provided us with a wealth of opportunities which resulted in us providing edge protection, steel flooring and handrailing worth over £1million for a number of projects.

The past 20 years have seen us work in a wide range of sectors and grow into an experienced provider of handrail standards, ladders, gates and grating solutions. We have also been involved in export projects in many countries including Saudi Arabia, Nigeria, China, Kazakhstan, Algeria, Cyprus, France, Dominican Republic and Holland.

With continued investment and product development, who knows where the next 20 years will take us?
