

RANGE OF PALLET GATES NOW AVAILABLE FROM STOCK

Our portfolio of safety gates now includes a range of pallet gates to allow employees to work safely on a mezzanine or raised working surface.

The pallet gates are designed to be easily incorporated or retro-fitted into a guardrail or barrier to ensure there is continuous protection for workers while items are being moved either up or down from the mezzanine.

Available in 4 options, the pallet gate range has been designed to be fully adjustable in width and can accommodate openings up to 1.8m.

Features and Benefits

- Compliant with EN14122-3 for assured safe operation
- Available in Galvanised Steel and Aluminium
- Built using KEE KLAMP and KEE LITE fittings, TUV approved components for quality assurance
- No welded parts so any damage can be easily repaired
- Cycle tested for 50,000 openings for assured durability
- Minimal number of moving parts for lower maintenance
