

## CE Marking for our fabricated products

BSG has successfully attained accreditation to certify that our Quality Management System complies with the requirements of ISO9001:2008 together with EC Certification of Factory Production Control (FPC) compliant to CPR 305/2011/EU working to the Harmonised Standard BS EN 1090-1:2009 + A1:2011 Execution Class 1 & 2. This enables us to CE Mark our products.

BSG now supports certification to be compliant with the latest legislation, manufacturing our products to the expected high levels of quality.

Ian Harpin, British Standard Gratings' General Manager said: "We are proud to have achieved the accreditation and in line with the philosophy of ISO 9001 and BS EN 1090 FPC we now start the next journey from a foundation of managing continual improvement."
